

KAM452 and KAM462 KAM Drop in Locker brush service kit fitting instructions.

Carefully disconnect the electrical connections from the original brush holders by removing the threaded caps. Remove the brush holder assembly from the bearing cap by removing the cap bolt. Fit the replacement brush holder and nip the cap bolt, insert the brushes and line up the brush holder, it may be necessary to bend the brush holder to obtain the optimum clearance. **MAKE SURE ONLY SPRING PRESSURE HOLDING THE BRUSH AGAINST THE BODY AND SLIP RING**, do not force it or you could damage the brush holder. Tighten the bearing cap to 60ftlbs torque. If the gland requires replacement use a sealant to ensure the gland is oil tight when screwed into the diff housing. Thread the electrical cable through the gland and tighten the gland nut to seal around the cable when sufficient cable is through to attach to the brush holder. Cable tie the spare cable to the brush holder to ensure it doesn't rub on the crown wheel. Reconnect the electrical cables taking GREAT care not to over tighten the threaded caps.

KAM455 Drop in Locker switch repair kit fitting instructions.

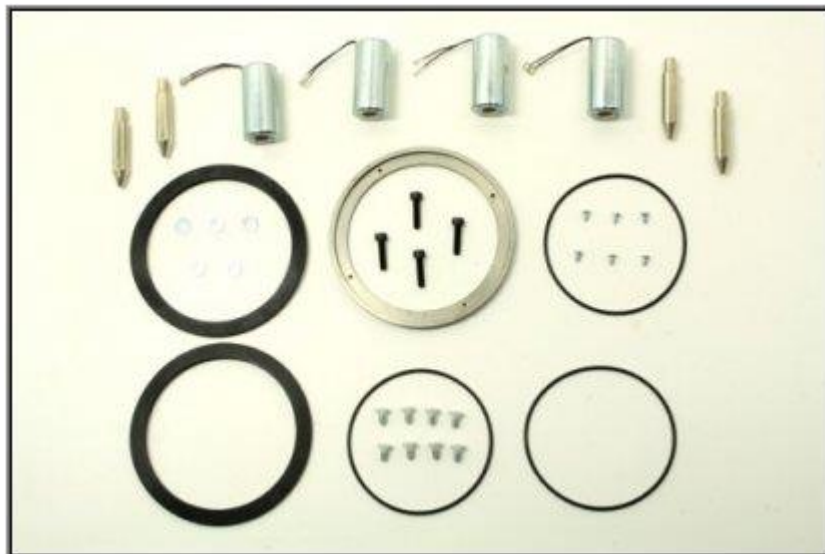

WARRANTY & DISCLAIMER - Terrafirma products are warranted free from defects in materials and workmanship for a period of 12 months from the date of retail invoice. Terrafirma does not warrant that the products manufactured or marketed by it comply with the laws of the country where those goods are purchased or used. It is the sole responsibility of the purchaser to ascertain whether products being purchased, or the fitting of those products to any other object, comply with local laws. This warranty covers structural defect and workmanship but does not cover finishes, labour charges for removal or refitting, freight costs, accident damage, misuse or abuse, damage due to incorrect or improper fitment or application, modified product, faulty design or consequential damage of any kind. Damage or defects caused by collision, alteration, improper installation, road hazards, adverse conditions or usage for any other purpose other than normal private usage are not covered by this warranty. Terrafirma shall not be liable for any other claim relating to the use of the product and any indirect special or consequential damage or injury to any person, company or other entity. All claims must be accompanied by the original retail invoice and should be submitted to the supplying Allmakes 4x4/Terrafirma distributor. This warranty covers only the replacement of the product or part concerned. The decision remains solely at the discretion of Allmakes Ltd. The information contained in this catalogue was correct at the time of going to press. Allmakes/Terrafirma and its associated companies reserve the right to alter the range and any product specifications without notice. Always consult your Allmakes/Terrafirma distributor for the latest product information and specifications. The Terrafirma range of products is constantly being evaluated for enhancement and improvement to make sure the level of quality and performance is as expected.

KAM462

Carefully prise the existing switch from its location, make a note of the wiring connections. Disconnect the switch from the wiring loom, select the correct facia, Front or Rear and carefully position and press the switch and facia together. Reconnect the wiring following the notes prior to disconnection. Re position the switch in its location.

KAM456 Drop in Locker solenoid kit fitting instructions

Be sure to study and record (take pictures) the dismantling process to ensure reassembly is accurate.

Remove the 8 countersunk allen screws, and remove the slip ring retaining plate, remove the top isolator. Make a note of the positions of the solenoid wires and disconnect the 4 wires connected to the slip ring. Remove the slip ring, remove the 3 O rings and the bottom isolator. Make a note of the positions of the solenoid wires and remove the 4 wires from the locker body. Remove the solenoids and lock ring. Remove the solenoid plungers from the lock ring and fit the new ones using Loctite on the threads. Refit the lock ring and new solenoids. Fit the new O rings and connect 4 of the solenoid wires to the locker body taking care routing the wires to avoid trapping them on reassembly.
